

Task 1: Student Registration & Data Storage

Aim : To design and develop a web-based Student Registration System using HTML5 and CSS3 for the front-end interface and a MySQL database for storing student details, and to implement data retrieval using SQL queries.

Algorithm:

1. Start the program.
2. Display the student registration form.
3. User enters details (Name, Email, DOB, Department, Phone).
4. Submit the form using POST method.
5. Connect to the MySQL database.
6. Insert the entered data into the students table.
7. Execute SELECT query to retrieve stored data.
8. Display the student records on the screen.
9. Stop the program.

Program :

index.html:

```
<!DOCTYPE html>

<html>

<head>

    <title>Student Registration</title>

    <style>

        body {

            font-family: Arial;

            background-color: #f2f2f2;

        }

        .form-container {

            width: 400px;

            margin: 50px auto;

            background: white;

            padding: 20px;

            border-radius: 10px;

        } input, select {
```

```
        width: 100%;
        padding: 10px;
        margin: 8px 0;
    }
    button {
        background-color: green;
        color: white;
        padding: 10px;
        border: none;
        width: 100%;
    }
</style>
</head>
<body>
<div class="form-container">
    <h2>Student Registration</h2>
    <form action="insert.php" method="POST">
        <input type="text" name="name" placeholder="Name" required>
        <input type="email" name="email" placeholder="Email" required>
        <input type="date" name="dob" required>
        <select name="department" required>
            <option value="">Select Department</option>
            <option>CSE</option>
            <option>ECE</option>
            <option>EEE</option>
            <option>MECH</option>
        </select>
        <input type="text" name="phone" placeholder="Phone" required>
```

```
        <button type="submit">Register</button>
    </form>
</div>
</body>
</html>
```

db.php:

```
<?php
$conn = new mysqli("localhost", "root", "", "student_db");
if ($conn->connect_error) {
    die("Connection failed: " . $conn->connect_error);
}
?>
```

insert.php:

```
<?php
include 'db.php';
$name = $_POST['name'];
$email = $_POST['email'];
$dob = $_POST['dob'];
$department = $_POST['department'];
$phone = $_POST['phone'];
$sql = "INSERT INTO students (name, email, dob, department, phone)
        VALUES ('$name', '$email', '$dob', '$department', '$phone')";
if ($conn->query($sql) === TRUE) {
    echo "<h3>Data Inserted Successfully!</h3>";
    echo "<a href='view.php'>View Students</a>";
} else {
    echo "Error: " . $conn->error;
}
$conn->close();
```

?>

view.php:

```
<?php
```

```
include 'db.php';
```

```
$sql = "SELECT * FROM students";
```

```
$result = $conn->query($sql);
```

```
echo "<h2>Student Records</h2>";
```

```
echo "<table border='1' cellpadding='10'>
```

```
<tr>
```

```
<th>ID</th>
```

```
<th>Name</th>
```

```
<th>Email</th>
```

```
<th>DOB</th>
```

```
<th>Department</th>
```

```
<th>Phone</th>
```

```
</tr>";
```

```
while ($row = $result->fetch_assoc()) {
```

```
    echo "<tr>
```

```
        <td>{$row['id']}</td>
```

```
        <td>{$row['name']}</td>
```

```
        <td>{$row['email']}</td>
```

```
        <td>{$row['dob']}</td>
```

```
        <td>{$row['department']}</td>
```

```
        <td>{$row['phone']}</td>
```

```
    </tr>";
```

```
}
```

```
echo "</table>";
```

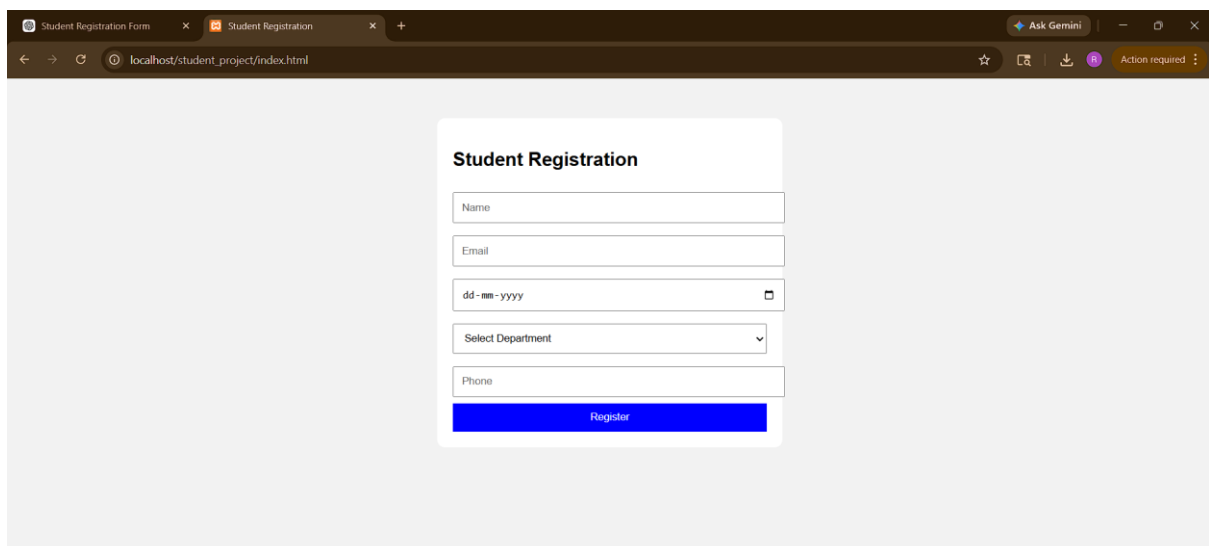

```
$conn->close();
```

```
?>
```

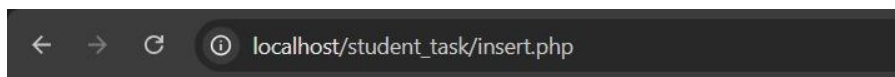

SQL:

```
CREATE DATABASE student_db;  
  
USE student_db;  
  
CREATE TABLE students (  
    id INT AUTO_INCREMENT PRIMARY KEY,  
    name VARCHAR(100),  
    email VARCHAR(100),  
    dob DATE,  
    department VARCHAR(50),  
    phone VARCHAR(15)  
);
```

OUTPUT:

The screenshot shows a web browser window with two tabs: 'Student Registration Form' and 'Student Registration'. The active tab is 'Student Registration', displaying a form titled 'Student Registration'. The form contains the following fields: 'Name' (text input), 'Email' (text input), 'dd-mm-yyyy' (date input with a calendar icon), 'Select Department' (dropdown menu), and 'Phone' (text input). A blue 'Register' button is at the bottom of the form.

The screenshot shows a web browser window with the URL 'localhost/student_task/insert.php'.

Registered Students

ID	Name	Email	DOB	Department	Phone
1	Rahul	rahul@gmail.com	2003-05-12	CSE	9876543210
2	Priya	priya@gmail.com	2002-09-21	IT	9123456780
3	Suri	ksuri820@gmail.com	2005-01-01	CSE	9063645626

Result: Thus, the student registration form is executed successfully and output generated.
