

Task 7: Interactive Web Form with Events & Functions

Aim : To develop an interactive feedback form using JavaScript events and functions for validation, user interaction, and dynamic responses.

Algorithm:

1. Start the program
2. Display the feedback form
3. User enters name
 - Validate input on keypress (allow only letters)
4. User enters email and feedback
5. Highlight fields when mouse hovers over them
6. Remove highlight when mouse leaves
7. On double-click submit button
 - Call validation function
8. Check all fields are filled
9. If valid → show confirmation message
10. Else → display error message
11. Stop the program

Program:

feedback.html:

```
<!DOCTYPE html>

<html>

<head>

  <title>Interactive Feedback Form</title>

  <style>

    body {

      font-family: Arial;

      background: #f2f2f2;

    }

    .container {

      width: 400px;

      margin: 100px auto;

      background: white;
```

```

        padding: 20px;
    }
    input, textarea {
        width: 100%;
        padding: 10px;
        margin: 8px 0;
    }
    button {
        width: 100%;
        padding: 10px;
        background: green;
        color: white;
        border: none;
    }
    .error {
        color: red;
    }
</style>
<script>
    // ♦ Reusable Validation Function
    function validateForm() {
        let name = document.getElementById("name").value;
        let email = document.getElementById("email").value;
        let feedback = document.getElementById("feedback").value;
        if (name === "" || email === "" || feedback === "") {
            document.getElementById("error").innerHTML = "All fields are required!";
            return false;
        }
        document.getElementById("error").innerHTML = "";
    }

```

```

        return true;
    }

    // ♦ Keypress Event (Only Letters)
    function validateName(event) {
        let char = event.key;
        if (!/[a-zA-Z ]/.test(char)) {
            event.preventDefault();
        }
    }

    // ♦ Mouse Hover Highlight
    function highlight(field) {
        field.style.background = "#e6f7ff";
    }

    function removeHighlight(field) {
        field.style.background = "white";
    }

    // ♦ Double Click Submit
    function submitForm() {
        if (validateForm()) {
            alert("Feedback submitted successfully!");
        }
    }
</script>
</head>
<body>
<div class="container">
    <h2>Feedback Form</h2>
    <input type="text" id="name" placeholder="Name"
        onkeypress="validateName(event)"

```

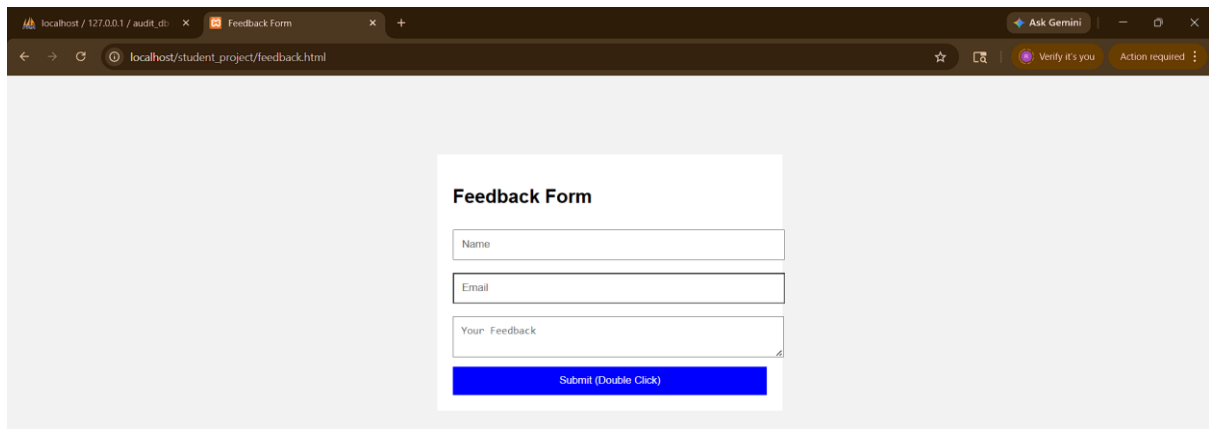

```

        onmouseover="highlight(this)"
        onmouseout="removeHighlight(this)">
<input type="email" id="email" placeholder="Email"
        onmouseover="highlight(this)"
        onmouseout="removeHighlight(this)">
<textarea id="feedback" placeholder="Enter your feedback"
        onmouseover="highlight(this)"
        onmouseout="removeHighlight(this)"></textarea>
<div id="error" class="error"></div>
<button ondblclick="submitForm()">Submit (Double Click)</button>
</div>

</body>
</html>

```

Output:

Result: Thus, the Interactive Web Form with Events & Functions was executed successfully and the output was generated.
